List of U.S. states and territories by exports and imports

This is a **list of U.S. states, U.S. territories, and the District of Columbia by exports of goods and imports of goods** as of 2018.^[note 1]

An export in international trade is a good or service produced in one country that is bought by someone in another country. The sum of the exports of the states is significantly lower than the value of the United States's total exports. The difference results from goods originating from states of origin, returned goods and goods with unidentified states of origin.

An import in international trade is a good or service produced in one country that is bought (imported) by someone in another country. The sum of the imports of the states is lower than the value of the United States's total imports. The difference results from goods originating from states of origin, returned goods and goods with unidentified states of origin.

Overall, Texas has the highest export rank, while the Northern Mariana Islands has the lowest export rank. California has the highest import rank, while American Samoa has the lowest import rank.
