

U.S. Security Cooperation with Ukraine

FACT SHEET

BUREAU OF POLITICAL-MILITARY AFFAIRS

APRIL 25, 2022

Share 

The United States, our allies, and our partners worldwide are united in support of Ukraine in response to Russia's premeditated, unprovoked, and unjustified war against Ukraine. We have not forgotten Russia's earlier aggression in eastern Ukraine and occupation following its unlawful seizure of Crimea in 2014. The United States reaffirms its unwavering support for Ukraine's sovereignty and territorial integrity within its internationally recognized borders, extending to its territorial waters.

Ukraine is a key regional strategic partner that has undertaken significant efforts to modernize its military and increase its interoperability with NATO. It remains an urgent security assistance priority to provide Ukraine the equipment it needs to defend itself against Russia's war against Ukraine.

Since January 2021, the United States has invested more than \$4.6 billion in security assistance to demonstrate our enduring and steadfast commitment to Ukraine's sovereignty and territorial integrity. This includes more than \$3.7 billion since Russia's launched its premeditated, unprovoked, and brutal war against Ukraine on February 24. Since 2014, the United States has provided more than \$6.4 billion in security assistance for training and equipment to help Ukraine preserve its territorial integrity, secure its borders, and improve interoperability with NATO.

United States security assistance committed to Ukraine includes:

- ◆ Over 1,400 Stinger anti-aircraft systems;
- ◆ Over 5,500 Javelin anti-armor systems;
- ◆ Over 14,000 other anti-armor systems;
- ◆ Over 700 Switchblade Tactical Unmanned Aerial Systems;
- ◆ 90 155mm Howitzers and 184,000 155mm artillery rounds;
- ◆ 72 Tactical Vehicles to tow 155mm Howitzers;
- ◆ 11 Mi-17 helicopters;
- ◆ Hundreds of Armored High Mobility Multipurpose Wheeled Vehicles;
- ◆ 200 M113 Armored Personnel Carriers;
- ◆ Over 7,000 small arms;
- ◆ Over 50,000,000 rounds of ammunition;
- ◆ 75,000 sets of body armor and helmets;
- ◆ Laser-guided rocket systems;
- ◆ Puma Unmanned Aerial Systems;
- ◆ Phoenix Ghost Tactical Unmanned Aerial Systems;
- ◆ Unmanned Coastal Defense Vessels;
- ◆ 14 counter-artillery radars;
- ◆ Four counter-mortar radars;
- ◆ Two air surveillance radars;
- ◆ M18A1 Claymore anti-personnel munitions;
- ◆ C-4 explosives and demolition equipment for obstacle clearing;
- ◆ Tactical secure communications systems;
- ◆ Night vision devices, thermal imagery systems, optics, and laser rangefinders;
- ◆ Commercial satellite imagery services;
- ◆ Explosive ordnance disposal protective gear;

- ◆ Chemical, Biological, Radiological, Nuclear protective equipment;
- ◆ Medical supplies to include first aid kits.

Presidential Drawdown Authority (PDA)

Pursuant to a delegation by the President, we have used the emergency Presidential Drawdown Authority on eight occasions since September 2021 to provide Ukraine **\$3.4 billion** in military assistance directly from DoD stockpiles.

Security Assistance

On April 24, the Department notified Congress of its intention to obligate more than \$713 million in Foreign Military Financing funding for Ukraine and 15 other Allied and partner nations in Central and Eastern Europe and the Balkans. Assistance in this Notification will help NATO Allies backfill capabilities they have donated to Ukraine from their own stockpiles to retain and strengthen NATO deterrence. More than \$322 million of these funds are notified for Ukraine and will further enhance its capability to defend itself against Russia's ongoing war.

So far in FY2022, DoD has provided \$300 million in security assistance to Ukraine under the Ukraine Security Assistance Initiative (USAI). In FY 2021, Ukraine received \$275 million under DoD's Ukraine Security Assistance Initiative (USAI). This included \$75 million in lethal assistance.

In FY 2021, the Department provided Ukraine \$115 million in Foreign Military Financing (FMF) and \$3 million in International Military Education and Training (IMET) funding. Prior to Russia's renewed invasion, FMF supported Ukraine's acquisition of a wide array of capabilities including counter-mortar radars, secure radios, vehicles, electronic equipment, small arms and light weapons, and medical supplies, among others.

The **Global Security Contingency Fund**, a joint program of the U.S. Departments of State and Defense, has provided more than \$42 million in training, advisory services, and equipment to assist the Government of Ukraine to further develop the tactical, operational, and institutional capacities of its Special Operations Forces, National Guard, conventional forces, non-commissioned officer corps, and combat medical care since 2014.

Excess Defense Articles (EDA)

On February 20, 2022, the United States utilized the [Excess Defense Articles program](#) to transfer Mi-17 helicopters to Ukraine.

Since 2018, the United States has provided Ukraine with four refitted U.S. Coast Guard Island-Class cutters. The refit was funded with Ukrainian national funds and FMF. Additional vessels are pending transfer.

Third Party Transfers (TPT)

In advance of Russia's invasion and after the outbreak of war in February 2022, the United States approved Third Party Transfers from 14 NATO Allies and close partners to provide U.S.-origin equipment from their inventories for use by Ukrainian forces. Deliveries to date include almost **12,000 anti-armor** systems of all types; more than **1,550 anti-air** missiles; radars; night vision devices; machine guns; rifles and ammunition; and body armor. The contributions from our partners and Allies are vital and appreciated.

Foreign Military Sales

The United States has \$595.9 million in active government-to-government sales cases with Ukraine under the Foreign Military Sales (FMS) system. FMS sales notified to Congress are [listed on the DSCA website](#), and significant prior sales include the: 2022 sale of non-standard artillery ammunition; 2018 sale of 210 Javelin anti-armor missiles, which first provided Ukraine with a critical anti-armor capability; the 2019 sale of 150 additional Javelins; and the 2020 Mark VI patrol boats sale. The Javelin sales were funded by a mixture of State Department FMF funds and Ukrainian national funds.

Direct Commercial Sales

From 2015 through 2020, the United States also authorized the permanent export of over \$274 million in defense articles and services to Ukraine via Direct Commercial Sales (DCS). The top categories of DCS exports to Ukraine during that period were Category III: Ammunition and Ordnance (\$88 million); Category XII: Fire Control, Laser, Imaging, and Guidance Equipment, (\$69 million); and Category XI: Military Electronics (\$22 million).

Border Security

Since 2017, the Department of State's Bureau of International Security and Nonproliferation has provided over \$28.4 million in Nonproliferation, Anti-terrorism, Demining, and Related Programs support to Ukraine through the **Export Control and Border Security (EXBS) Program**. The State Border Guard Service of Ukraine (SBGS) has been a primary recipient of EXBS assistance. EXBS also provided assistance to Ukraine Customs and export control and sanctions authorities. Until Russia's full-scale invasion in 2022, a major focus of EXBS efforts was the development of SBGS's Maritime Border Guard operational and sustainment capabilities to replace capabilities lost during Russia's unlawful annexation of Crimea and introduce modernized equipment, training, and procedures. EXBS also provided advisory and equipment assistance for SBGS land border elements. Following Russia's further invasion in February 2022, EXBS transitioned to providing non-lethal assistance and continued advisory support to the SBGS and other government partners, while also supporting sanctions and export control implementation to respond to Russia's aggression until such time as normal operations and reconstitution of Ukraine government services can resume.

Conventional Weapons Destruction

From 2004 to 2021, the United States provided more than \$77.3 million to clear landmines and unexploded ordnance left by Russia's forces and Russia's proxies in the Donbas region, strengthen Ukraine's demining capacity, and enhance security services' capacity to manage weapons and ammunition stockpiles. In 2021 alone, the U.S. government funded Conventional Weapons Destruction (CWD) programs that cleared and returned more than 1.9 million square meters (477 acres) of land to local communities that was previously contaminated with explosive hazards. Since Russia's further invasion, U.S.-funded digital explosive ordnance risk education campaigns have provided lifesaving information to more than 18 million people in Ukraine. Additionally, Ukrainian demining authorities previously trained and equipped by the United States are leading emergency efforts to remediate the massive levels of explosive hazard contamination littered across the country by Russian forces.

Global Peacekeeping Operations

Ukraine was a significant troop contributor to United Nations peacekeeping operations before its troops were called home to defend Ukraine, including a helicopter unit to the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo (MONUSCO). Ukraine

is also a partner country of the Global Peace Operations Initiative and has benefited from nearly \$4 million in peace operations capacity-building assistance.

State Partnership Program

Ukraine is partnered with the California National Guard under DoD's [State Partnership Program \(SPP\)](#) . Established in 1993, SPP's goal was to assist former Warsaw Pact and Soviet states in their democracy efforts and to reform their defense forces following the Soviet Union's collapse. Over the past 29 years, California National Guard conducted regular military-to-military engagements with Ukrainian forces, contributing to Ukraine's continued defense modernization.

Joint Exercises

Ukraine participates in multiple bilateral and multilateral military exercises with the United States, EU, and NATO Allies to include Rapid Trident, Sea Breeze, and Cossack Mace.
